Subject line: Finder's March Cryptocurrency Predictions Report: ETH forecast to see greater growth than BTC in market cap by December 31 / BTC to hit \$US29,533 (\$AU38,007) by end of year

- finder.com.au releases March 2018 Cryptocurrency Predictions, 12 coins forecast
- BTC to hit \$US29,533 (\$AU38,007) by end of year
- **Ethereum (ETH) forecast to see higher growth in market cap than bitcoin (BTC)** by Dec 31, 2018
- All coins expected to rise in value by end of 2018
- **Dogecoin (DOGE) will experience the greatest growth** by December 31, 2018 (+2,920%)
- **Ethereum (ETH)** and **Stellar Lumens (XLM)** predicted to be the ones to watch in 2018

Good morning,

The results from our March 2018 [Cryptocurrency Predictions Survey](#), have just been released, so we wanted to share the key findings below.

This month, 9 fintech leaders have provided their forecasts on how the top 10 by market cap and top 2 trending cryptocurrencies will perform in 2018.

Out of the 12 coins under review, our panellists predict that **Dogecoin (DOGE)** will experience the **greatest growth** by December 31, 2018 (+2,920%). **Cardano (ADA)** has the **second greatest increase** in value (+595%) by the end of the year, followed by **Ripple (XRP)** (+541%).

All coins are expected to rise in value by the end of 2018, signalling optimism for future growth.

Comparing the forecast market capitalizations for bitcoin (BTC), Bitcoin Cash (BCH) and Ethereum (ETH) – the only three of the 12 coins with reported number of coins available – **Ethereum (ETH) is predicted to see the highest growth** by the end of the year (+212%). This was followed by Bitcoin (BTC) with a +194% increase, and Bitcoin Cash (BCH), with an increase of +123%.

The top coins to watch out for this year, according to our panelists, are Ethereum (ETH) and Stellar Lumens (XLM).

The full details of the report, including comments from the panellists and methodology, can be found here: <https://www.finder.com.au/cryptocurrency-predictions>
